

CV-MARC®

Commercial Vehicle Management and Reporting Center

Malone Specialty Inc. brings customers an innovative and patented, on-demand commercial vehicle management system. This system monitors and controls vehicle and engine activity, and is proven technology currently being utilized by thousands of vehicles.

Features:

- **Idle Limiting** - monitors idle time and shuts the engine down if the time exceeds a preset limit.
- **Monitors engine** oil pressure, temperature, coolant level, battery voltage. The system is able to shut down the engine should a fault occur.
- **GPS Tracking capabilities*** (Comet Tracker™) - offers real-time vehicle and engine monitoring, engineered by Malone Specialty Inc. partner Actsoft™ Inc.
- **PTO operation** and extreme outside temperatures can be programmed to disable idle limiting.
- **Battery Protection System*** - Shuts down power to protect battery.
- **System memory**- Faults are recorded & downloadable.
- **Headlights alarms** if left on with the engine off.
- **Box temperature monitoring*** for perishable cargo.

Benefits:

- Saves fuel cost by idle limiting.
- Reduces Engine Failures.
- Saves jump starts by protecting battery.
- Provides valuable management information on the vehicle and Driver performance.
- Reduces overall wear and tear on the vehicle
