

Patented CVMARC Engine Protection Systems with Idle Limiting

The CVMARC kits for the Isuzu / GM N & W series truck are available in three different versions. Idle Limiting only, a Complete Engine Protection System with Idle limiting and a retrofit kit that adds Idle Limiting to an existing preinstalled Engine Protection System IH2 option.

The three different kits include the following items;

Idle Limiting only = Interconnecting Cab, Chassis and Speed Signal harnesses, Module and Display.

Complete kit = Switches, Interconnecting Cab, Chassis and Speed Signal harnesses, Module and Display.

Retrofit kit = New Module, Display, Cab Harness and Speed Signal Harness.

Advanced CVMARC2 Kits - These kits have the ability to be hooked up to a GPS Tracking System with optional equipment. Call for details.
